

BUSINESS INSIGHTS (FINAL THINKING)

5 SQL Insights

1. The dataset contains **21,409 events** generated by **10,000 unique users** across multiple sessions.
 2. **Browse** is the most frequent event, while **Purchase** is the least frequent, showing a decrease in users throughout the conversion funnel.
 3. **Google Ads** is the highest-performing marketing channel, generating the maximum revenue.
 4. The **South** region contributes the highest revenue compared to other regions.
 5. **Desktop** users have the highest conversion rate, indicating better purchase performance than Mobile and Tablet users.
-

5 Dashboard Insights

1. The largest user drop-off occurs between the **Browse** and **Add to Cart** stages.
 2. **Google Ads** is the most effective channel in terms of revenue generation.
 3. The **South** region is the highest revenue-generating region.
 4. **Desktop** devices achieve the highest conversion rate among all device types.
 5. The dashboard shows that only a small percentage of browsing users complete a purchase, highlighting an opportunity to improve the conversion funnel.
-

3 Business Recommendations

1. Improve the **Browse to Add to Cart** experience by providing personalized product recommendations, promotional offers, and clear product information.
2. Increase investment in **Google Ads** because it generates the highest revenue and attracts valuable customers.
3. Improve the **Mobile** user experience by optimizing website performance and simplifying the checkout process to increase conversions.
